

Set Your **GPS** For Success

KEYNOTE | WORKSHOP | SEMINAR

program your subconscious for unlimited success

These days if you wish to get someplace fast, with no wrong turns, you just program your car's GPS and follow the commands. You choose a destination, then take the best route to your goal.

Your brain works the exact same way: Choose where you want to go, and your subconscious takes over from there. Trouble is, your subconscious is also a storage area for habits and beliefs that either keep you on track or throw you off course. If you don't program it for success, you'll never reach your destination.

Wayne Lee helps you access and harness the power of your GPS (Great Programmable Subconscious) for peak performance at work and at home. His presentations open the mind and melt away stress and negative interference, and reveal what's possible when you program your GPS for success.

Deeply engaging, always down-to-earth, Wayne Lee delivers life-changing content and an exhilarating one-of-a-kind experience.

You and your audience will learn how to:
